

ford design

creating your space

21 September 2010

To whom it may concern:

In 2008 Ford Design Ltd approached Richard Mobbs from Yes Disability Resource Centre to provide us with design ideas and costings for an accessible kitchen for one of our wheel chair bound clients.

Richard was very efficient in his initial response by providing us with samples of the package we would receive from him along with a specification and appliance recommendations. He also provided us with a list of detailed information/questions required to enable him to produce such work.

Richard informed us that he would work with consultants locally to him to supply us with a quotation but was also happy to work with our preferred local consultants to ensure our client received the best product/service.

We were impressed by Richard's knowledge, and supply of accessible components not readily seen on the New Zealand market for accessible bathrooms and kitchens.

Ford Design Ltd would recommend the service provided by Richard from the Yes Disability Resource Centre.

Yours faithfully,

Ross Ford
Managing Director
Ford Design Ltd
